

The Master Mind

RENEW YOUR MIND

Njeri Muchunu
DESTINY GIVER

You deserve a wonderful life, full of peace, success, happiness, joy, and excitement. These are your birthright. However, you are a product of your thinking. What's going on outside of you is a reflection of what's going on inside of you and it cannot be otherwise. Your mind is extraordinarily powerful. Your thoughts control and determine almost everything that happens to you. Do you find that you are struggling-working at jobs you don't like, staying in relationships you don't enjoy, earning a salary way below your potential, and living a life that gives you no satisfaction? This is because your mind has not been renewed and therefore your vision is blurred. If you want to change something on the outside, you have to begin by changing it first on the inside. You have to renew your mind if you want to change your life. If you are ready to leverage yourself to greatness and achieve giant results, the key is to tap into

THE MASTER MIND.

In **THE MASTER MIND**, Njeri Muchunu offers practical nuggets of wisdom that will challenge your thinking. You are your most valuable resource and you must always invest in this resource where you can get the highest return. It has been said, "When a man's fight begins with himself, he is really worth something." Masters of their own minds always ask the question, "What is it in me that is holding me back?"

THE MASTER MIND is a 12-week journey, that will unravel your thinking to see differently; live differently; experience freedom; heal; experience tremendous peace and joy. On the way, we will examine those areas of your life that have been difficult, limiting or negative to see how we can begin to change our thinking in these areas.

"It will not be an instantaneous experience, but with God's help it will be a miraculous one, full of abundance and excitement." NJERI MUCHUNU
